ABOUT US

Introduction (Company Identity)

Tehnohemija is a domestic company with a long-standing tradition in the production of household chemicals and hygiene maintenance products. Since its establishment, our goal has been to provide products that combine quality, safety, and affordability, while continuously monitoring and responding to market needs.

History and Tradition

Our story begins in Belgrade, a city with a strong chemical industry tradition. Over the years, we have developed a wide range of products—from detergents and cleaning agents to specialized formulations for disinfection and industrial use. We are proud that our products are used in households across Serbia and the wider region.

Standards and Quality

We are committed to the highest standards of quality and safety. Our production processes are organized in accordance with international ISO standards, ensuring reliability and consistency in every product.

Innovation and Development

We continuously invest in research and development, carefully listening to the needs of our customers and the market. Our focus is on innovative formulations that simplify everyday life, as well as environmentally friendly solutions that contribute to a sustainable future.

Vision

Our vision is to become a synonym for reliable household chemicals in the region—recognized for quality, innovation, and responsible business practices.
